

DJ D.RUSSO

BIO

It all started for Dino Russo AKA DJ D.Russo in 2011 with a DJ controller that was barely bigger than a college textbook and cost less than \$100. He spent hours practicing basic DJ techniques in the comfort of his dorm room. The itch to play in front of a crowd started to quickly surface. Within a few months D.Russo found himself DJing at different house parties around his college town. Word quickly spread of the energy he brought to a party with his sets and was sought after for University events and many of the Greek Life events on and off campus.

Fast forward a few years and D.Russo is now DJing regularly throughout venues in Hoboken, NJ in addition to private functions. Over the years he has played to a various mix of crowds and gained the experience to read a room and play a set according to the people in front of him. Whether it is an intimate house party or a night club, D.Russo can play it.

It was after DJing at a rooftop pool party during WMC 2017 in Miami that D.Russo decided he was ready to take his DJ career to the next level. The day after his rooftop set, D.Russo was lucky enough to meet DJ Cova, who was willing and ready to take him under his wing and guide him through Ableton & music production. In just one year, D.Russo went from never opening a DAW, to producing 9 of his own edits/mash-ups, 2 remixes/bootlegs and 1 original track. Even with 6 years under his belt, D.Russo considers this just the beginning.
